

NATURE IS THE
BEST TEACHER.

pagholz®

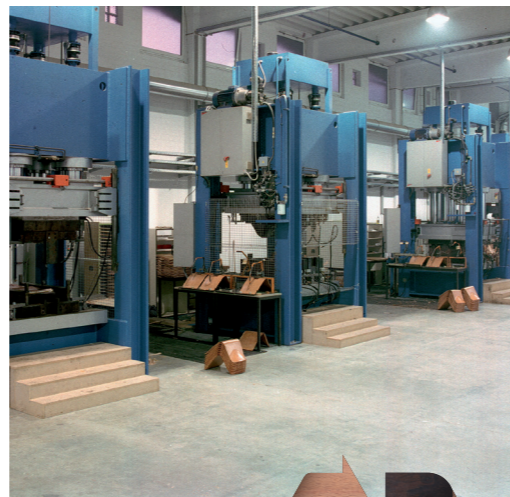

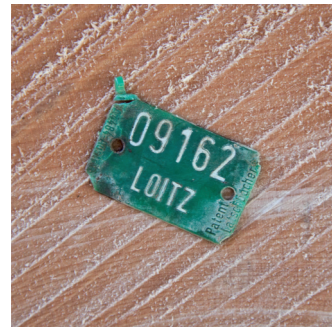

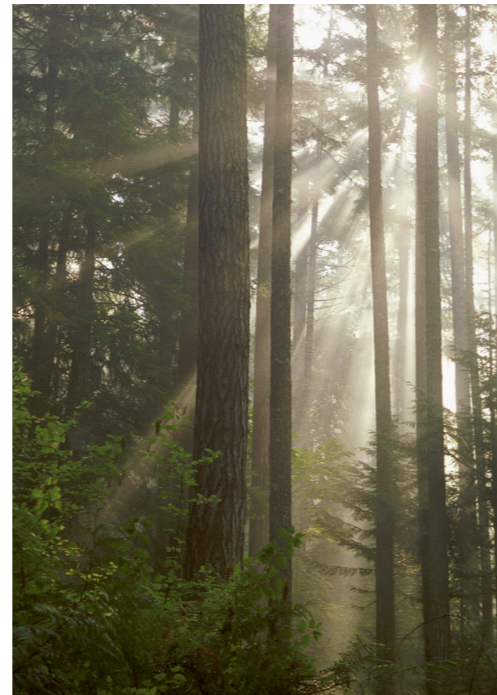

PRODUCTION A REAL NATURAL PRODUCT.

Wherever furniture is subject to a lot of stress, we rely on PAGHOLZ®, an invention from our company. For PAGHOLZ®, thin layers of veneer are painstakingly prepared, coloured individually and soaked in resin. Only then do we press them into the desired shape with the application of heat and up to 2,000 tonnes of pressure.

PAGHOLZ® has the natural appearance of solid wood, supplemented by additional valuable properties which are usually only provided by stone or metal. What this means for you: easy cleaning and a hardly flammable, self-extinguishing material which can even be weatherproof on request with the use of special resins.

You can be sure of this: we only use native beech trees from stocks which are being carefully replanted. And all PAGHOLZ® products are, of course, particularly durable and can be recycled.

stain- and abrasion-resistant

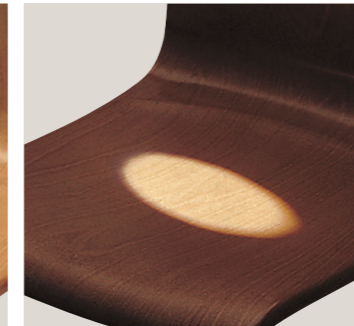

shock- and break-proof

resistant to chemicals

lightfast

hardly inflammable, self-extinguishing

hygienic

scratch and wear-resistant

ADVANTAGES

- high dimensional stability
- high scratch and wear resistance
- shock resistance and breaking strength
- stain and abrasion resistance
- lightfastness and chemical resistance
- weatherproof on request

CHANGE SERIES

TIMELESS DESIGN

The classic, yet modern design makes the CHANGE series appear timeless - and the material used ensures that it actually is timeless as well.

Comparable with the properties of metal, plastic and stone, Pagholz® withstands daily use for a long time, whilst retaining the charm of a real natural product.
